ADAM SHAYLOR

2023 SE 38th AVE, PORTLAND OR 97214

BUSINESS@ADAMSHAYLOR.COM

+1 503 577 0583

Senior Software Engineer
WALMARTLABS, PORTLAND OR

4/16

Prototyped responsive layouts with the user experience team

Built and launched a new mobile cart and checkout flow in Angular

Led the standardization of React component styling and typography

Worked specifically on mobile web development and its idiosyncracies

Exceeded performance review expectations

6/15

Front-End Developer
POLLINATE, PORTLAND OR

Collaborated with clients, art directors, graphic designers and 3D studios

Led the two largest JavaScript projects in the agency's history in both lines of code and revenue

Participated in "what-if" brainstorming sessions, generating creative solutions to client problems

Added animations and transitions to user interface design in collaboration with the creative team

Taught junior developers JavaScript fundamentals and software architectural patterns, providing code reviews and impromptu debugging assistance

Designed a custom query language to aid in the composition and consumption of basic rulesets in both browser and server side environments

Wrote the canonical implementation of the query language in JavaScript

Established project standards, including style guides and unit tests

Recruited and interviewed new engineering talent

1/12

Front-End Developer
SMUGMUG, MOUNTAIN VIEW CA

Collaborated with design and product management on a new control panel

Maintained a web application serving millions of paying customers

6/11
